

Reading Comprehension Strategies

Predicting – Using information from graphics, text and experiences to anticipate what will be read and to actively enhance and adjust comprehension while reading.

Summarizing- Identifying and accumulating key ideas in a text.

Connecting- Engaging and applying background information to construct a deeper understanding of key ideas and themes while reading.

Questioning- Posing and answering self-generated questions that clarify meaning and promote deeper understanding of text.

Inferring – Forming a conclusion about the author's meaning using background knowledge and clues from text.

Imaging- More than visualizing, imaging helps readers create organized sensory and conceptual images to process and understand text.
