

Are you taking advantage of possible tax savings?

Many people get insurance coverage to help prepare for the unexpected, but Flexible Spending Accounts (FSAs) can help with eligible costs you know are coming—like prescriptions, contact lenses, or daycare programs. **Plus, FSAs may help you reduce your taxable income so you take home more of your earnings.**

Meet with an American Fidelity representative to see how an FSA could help you take home more of your paycheck and save on eligible medical and daycare expenses.
