

Reading Comprehension and Writing Skills

With an emphasis on developing comprehension with texts, students are exposed to a variety of literature and informational texts and learn how different genres, or types, of books have different structures. Students are encouraged to read, read, read and to expand their knowledge in areas of personal interest or new research topics. They begin to develop analytical skills, going beyond stating explicit information from the text to learning how to draw inferences and how to summarize what they read.

In grades three through five, students are becoming more sophisticated writers and speakers. These skills include engaging in research projects that question what they read and hear, taking information and putting it into their own words, and creating written pieces that follow a structure geared toward a writing purpose (e.g., a narrative story, an informational report, or an opinion text). Classrooms allow children to explore new topics using books, videos, and technology and participate in interactive, collaborative activities with teachers and classmates.

To help your student develop literacy skills:

- ▶ Make books special—give them as gifts, take your student to the library to explore different types of books, read with your student, create a cozy place for reading and writing, or introduce your student to a book series or your favorite children's book author.
- ▶ Play word games with your student in the car, ask your student to summarize a favorite episode from a video or book, and start a conversation with your student and encourage him or her to ask questions and share opinions about a topic.

What Your Student Will Learn:

California Common Core State Standards for ELA/Literacy

Students engage in new and challenging literacy experiences as they develop skills and knowledge under the California Common Core State Standards for English Language Arts/Literacy. The standards are organized around four strands—Reading, Writing, Speaking and Listening, and Language—which define what students are expected to learn by the end of each grade.

Students in grades three through five build on their foundational reading skills by improving their reading fluency and decoding longer and more difficult words. Learning also focuses on three new emphases: (1) more exposure to content-rich informational texts; (2) developing and writing opinions using evidence from books and other text resources; and (3) engaging in group and individual reading and research activities centered on more complex texts with new vocabulary.

Analysis of Text

Students continue to critically analyze and reflect how what they read impacts their comprehension. This table shows some of the skills in the Reading Standards for Literature that students learn by the end of each grade.

Grade	Examples of Making Meaning with Text
3	Students distinguish their own point of view from that of the narrator or those of the characters.
4	Students compare and contrast the point of view from which different stories are narrated, including the difference between first- and third-person narrations.
5	Students describe how a narrator’s or speaker’s point of view influences how events are described.

Developing Language Skills

To support their reading, writing, and use of language, students continue to strengthen their vocabulary and grammar through the Language Standards. Learning to identify and understand word relationships and nuances in word meanings is critical. This includes knowing general academic words (used in all sorts of texts and subject areas) and content-specific words (important to understanding specific topics or field of study). As part of their development of understanding, students in this grade span

- ▶ distinguish the literal and non-literal meanings of words and phrases in context (e.g., take steps) (Third Grade);
- ▶ explain the meaning of simple similes and metaphors (e.g., as pretty as a picture), in context (Fourth Grade);
- ▶ interpret figurative language, including similes and metaphors (e.g., the clouds sailed across the sky) in context (Fifth Grade).

Speaking and Listening Skills

Speaking and listening skills are important for communication. Students continue to build their skills through collaborative conversations on grade-level topics and texts. In addition, students work on improving comprehension in the following ways.

Grade	Increasing Listening Comprehension
3	Determining the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
4	Paraphrasing portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
5	Summarizing a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
